Claims 1-75 have been canceled, claims 76-78 have been added by the amendment filed November 4, 2003. As such, the restriction requirement has been moot. The examiner acknowledges the interview on November 3, 2003 to discuss the response the restriction requirement.

Claims 76-78 are pending for examination.

The cross-reference information needs to be updated to reflect the fact that the '175 application has been issued as US Pat No. 6,379,698.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,379,698. Although the conflicting claims are not identical, they are not patentably distinct from each other because both the examined claims and patent claims embrace a lipid compound and

Art Unit: 1632

salts and hydrates thereof as recited in claim 1 of the patent. When read in light of the as-filed specification, the claimed subject matter or formula as claimed in the patent also embraces the compound as presently recited in claim 78.

Thus, both the examined claims and patent claims are obvious variants of one another.
